ACADEMIC CREDENTIALS

Bangladesh University of Engineering and Technology (BUET) **November 2021 – June 2026**
Graduated with a B.Sc. in Civil Engineering, Major: Structural Engineering **Dhaka, Bangladesh**

- Overall CGPA: 3.57 out of 4.00 (3.71 out of 4.00 in the last three semesters)

Relevant Coursework

-Dynamics of Structure
-Design of Concrete Structures I & II
-Prestressed Concrete
-Analysis of Indeterminate Structures
-Structural Analysis
-Design of Steel Structures

Dhaka City College **July 2018 – June 2020**
Higher Secondary Certificate (HSC) | GPA: 5.00/5.00

PROFESSIONAL EXPERIENCE

Lecturer, Department of Civil Engineering — Anwer Khan Modern University **16 September 2026 – Present**

Course Taken:
CE-4103 Prestressed Concrete || Hum-4101 Socio-Economic Aspects of Development Project || CE-4104 Building Design Sessional || CE-3106 Structural Analysis and Design-II sessional || CE-1008 Civil Engineering Drawing Sessional || CE-4301 Geotechnical Engineering-II 4 || CE-4302 Geotechnical Engineering-II Sessional

- Prepare lecture notes, teaching materials, and course resources.
- Conduct lectures and sessional activities.
- Prepare examination questions and evaluate assignments and examination scripts.

RESEARCH INTERESTS

Reinforced Concrete	Structural Analysis and Design	Prestressed Concrete	Fiber-Reinforced Concrete
Concrete Technology	Sustainable Construction Materials	Waste-to-Resource	Structural Engineering

RESEARCH EXPERIENCE

Undergraduate Thesis *[UG_thesis_book]*

Flexural Performance of Reinforced Concrete Beams Incorporating Polypropylene, Galvanized Iron and Steel Fiber

Supervisor: Dr. S. M. Faisal Mahmood, Associate Professor, Department of Civil Engineering, BUET. [GS link]

- Experimentally investigated the effects of GI, PP & SF fiber types and dosages on reinforced concrete beam behavior.
- Prepared and tested concrete specimens with PP fibers at 0.5% and 1.0%, GI fibers at 60 and 100 kg/m^3, steel fibers at 60 kg/m^3, and selected hybrid GI–PP combinations.
- Conducted laboratory tests to evaluate compressive strength, splitting tensile strength, modulus of elasticity, and flexural properties.
- GI fiber gives approximately equal results compared to SF & more fiber content decreased workability.

Conference Paper (Under Review)

1. C. K. Mohonta[1], M. Sadiya[2], M. A. Mamun[3], S. Newaz[4], M. S. Hasan[5] and S. M. F. Mahmood[6], **"**Flexural Performance of Reinforced Concrete Beams Incorporating Polypropylene Fiber", Paper ID- 1097, ICACE, CUET. [full paper]

2. **C. K. Mohonta**[1], M. Sadiya[2], M. A. Mamun[3], S. Newaz[4], S. M. F. Mahmood[6], "Flexural performance of Reinforced Concrete Beams Incorporating Steel Fiber & Galvanized iron fiber", Paper ID-192, IICSD 2027, DUET. [full paper]

3. A. Ghosh[1], **C. K. Mohonta**[2], N. Huda[3], "Co-Composting Organic Waste and Faecal Sludge in Local Towns of Developing Nations: Suitability Evaluation for Decentralization", ICATS, BUET. [full paper]

- Reviewed 100 publications on decentralized co-composting of municipal organic waste and faecal sludge, focusing on process optimization, pathogen reduction, nutrient recovery, environmental sustainability, and implementation feasibility.

ACADEMIC PROJECTS

CE 404 Capstone Project — Establishment of a High School in Khilkhet, Dhaka

- Completed project planning, feasibility assessment, and conceptual design.
- Designed academic and auditorium buildings using ETABS.
- Performed structural analysis and detailed structural design using BNBC 2000.

CE 200 — Details of Construction

- Visited an under-construction building at Azimpur Staff Quarter.
- Prepared a presentation on installation of utility lines in buildings.

CE 302 — Professional Practice and Communication Sessional

- Evaluated a tender as part of the course project.

CE 316 — Bridge Design Sessional

- Designed a slab bridge
- Designed a prestressed concrete (PC) girder bridge.

CE 320 — Steel Structure Design Sessional

- Designed a warehouse and analyzed the effects of lateral loads on the members
- Designed a three-story building.

CE 410 — Building Design Sessional

- Designed a 16-storey residential building.

CE 206: Engineering Computational Sessional: Rainfall–Surface Runoff Analysis

- Used MATLAB in the analysis of the relationship between rainfall and surface runoff.

TECHNICAL SKILLS

Structural analysis and design: ETABS, SAP2000

CAD and drafting: AutoCAD, SketchUp

Programming and analysis: MATLAB, C++

AWARDS & HONORS

- BUET Merit Scholarship: GPA 3.87 (Level-4/1)
- Technical Scholarship (Level-1/1- Level-4/2)
- Board Scholarships: JSC (2015) and SSC (2018)
- Second runner-up, Sustainable Concrete Solution Competition organized by the ACI BUET Student Chapter

LEADERSHIP & PROFESSIONAL ACTIVITIES

- Vice President, ITE BUET Student Chapter.
- Member, ACI BUET Student Chapter.
- Member, BUET Innovation and Design Club (BIDC)

INDUSTRIAL & SEMINAR EXPOSURE

Industrial Trainee — Mazidsons Construction Limited **November, 2025 – December, 2025**

Observed RCC construction, reinforcement detailing, site supervision, formwork, concreting processes, and safety practices.
Site visit: Shah Cement Factory.
Seminar: Participated in an ACI webinar hosted by Islamic University of Technology (IUT).
